## COVCARE

COVCARE specializes in producing contactless sanitizer dispenser stand to ensure hygiene and safety throughout the workplace. It is a foot-operated hand sanitizer dispenser. This has enabled the option of a touch-free hand sanitizer dispenser.

The stand is highly durable and easily portable. The sanitizer dispenser stand is complete with any medium or large sanitizer bottle with a nozzle as there is a provision to adjust the dispenser holder.

The sanitizer stand is available for purchase directly from us at COVCARE or from our authorized dealers.

## USERS

Our products are widely used in mass or public gathering areas that are frequently visited and can be used anywhere irrespective of location and space.

The COVCARE contactless sanitizer dispenser makes sure that virus or bacteria is not spread by contact due to sanitizer usage. It is easy to install and use. It has passed various durability tests and is easily portable.

## CORPORATE SOCIAL RESPONSIBILITY

We at COVCARE have a social responsibility embedded with our products. With every COVCARE product you buy, you unknowingly provide to the downtrodden and needy. All sale proceedings of our product are donated to SEVA SEE Foundation- an NGO committed to serving the less privileged sectors.

**YOU TOO CAN BE A PART  
OF THIS NOBLE CAUSE.**
